Work Experience

Astriddao Company, American | Front-end leader | March 2022 ~ Now

1. **Front-end leader of the noname project** (an NFT trading platform). **Difficulties:** Encapsulation of multi-chain contracts; GraphQL+Redux encapsulation of the front-end data layer; SEO optimization of Nextjs; encapsulation of NFT contract transactions (quotation/pending orders/sales/Seaport integration); internationalization and mobile terminal adaptation. Online address: <https://noname.monster>
2. Independently developed Sio2 coin issuance and lending platform using the web3+Next framework, attracting tens of thousands of transactions. <https://sio2.finance>
3. Complete the mobile phone adaptation of the astriddao project, so more users can access through mobile phones. <https://app.astriddao.xyz>
4. Built and led a team of 3 high-performing software engineers

Houren Education, Pittsburgh, USA | Front-end leader | March 2019 - March 2022

1. Developed 4 android and ios compatible apps using React-Native, perfectly covering all the company's businesses
2. Built an ERP system using React+Formily to improve the work efficiency of 100+ teachers greatly and reduced company management costs
3. Designed and developed 6 SEO-friendly websites using Nuxt+Next so more students can search for the company's business
4. Built a highly available,fault-tolerant microservice architecture based on Node,GraphQL,Docker

iFLYTEK Co., Ltd. (April 2018 - March 2019) Leisure One Finger Co., Ltd. (March 2016-April 2018)

Front-end development, Technology Stack: Vue, Electron, Egret,etc

1. Built multiple teacher management systems using Vue for the Education Bureau
2. Developed the home page module of the app using react-native
3. Built small games based on Egret+Typescript on Alpha Egg to serve the vast number of kindergartens
4. Developed computer-side courseware system using Electron for Education Bureau, used by 1 million primary and secondary school students

Education

Veterinary Medicine | 2009 | Huazhong Agricultural University
