Work Experience

Astriddao Company, American | Project Leader | March 2022 ~ Now

The Bluez Project (NFT Image Trading Platform) Project Leader:

1. **Crawler**: Write subgraphs, monitor on-chain events, and capture on-chain data ([@graphprotocol/graph-cli](#)); write ETL processes to fetch subgraph data, process it into the required backend format, and send it to the backend ([Python](#)).
2. **Backend**: Receive data sent by ETL / write backend GraphQL APIs using FastAPI / create various scheduled tasks ([python fastapi](#)).
3. **Frontend**: Wallet connection (wagmi / thirdweb-sdk) / encapsulation of multi-chain contracts / GraphQL+Redux for the frontend data layer / encapsulation of NFT contract transactions (bidding / listing / selling / Seaport integration) / internationalization and mobile adaptation ([React+Typescript](#)).

Other Similar Projects: Macaron Finance: <https://macaron.finance/> ([React](#) / [ContractHelper](#)); LST Astake: <https://astake.dev/> ([Vue](#) / [ContractHelper](#)); Web3 Lending Platform: <https://c14.wtf> ([Nextjs](#)); <https://sio2.finance> ([React](#) / [ContractHelper](#)); Cryptocurrency Trading: <https://app.astriddao.xyz/>

Houren Education, Pittsburgh, USA | Front-end leader | March 2019 - March 2022

1. Developed 4 android and ios compatible apps using [React-Native](#), perfectly covering all the company's businesses
2. Built an ERP system using [React+Formily](#) to improve the work efficiency of 100+ teachers greatly and reduced company management costs
3. Designed and developed 6 SEO-friendly websites using [Nuxt+Next](#) so more students can search for the company's business
4. Built a highly available, fault-tolerant microservice architecture based on [Node](#), [GraphQL](#), [Docker](#)
